

Garrett Adams

garrettadamssss@gmail.com | (714) 345-1866 | Orange County, CA

Software Engineer with 3+ years of experience building scalable web applications using TypeScript, Svelte, and React, with expertise in frontend architecture, analytics platforms, testing, and CI/CD.

EXPERIENCE

Associate Software Engineer, Paramount June 2023 - Present

- Co-developed Nebula, a TypeScript analytics platform offloading tracking logic into a service worker, reducing client application complexity and improving maintainability
- Led cross-team adoption of Nebula across three production applications serving 150k+ daily users by developing new features, resolving bugs, and designing a scalable configuration system
- Executed all phases of the software development lifecycle for Lite, a low-end device-optimized Pluto TV/Paramount+ converged app, from requirements analysis and design through implementation, integration, and device validation
- Strengthened code quality with Playwright end-to-end tests, Jest unit tests, Vite build configuration, and NX monorepo project management

Team Lead, Northrop Grumman Collaboration Project Aug 2022 - May 2023

- Led a 5-member team to design an autonomous aircraft system capable of real-time fire detection
- Integrated Pixhawk flight controller, Jetson Nano, and onboard camera with aircraft flight system
- Developed wireless communication, autonomous flight control, mission planning, and telemetry monitoring using MAVLink, Flask, and Requests Python libraries

Researcher, NSF REU: Unmanned Aerial Systems May 2022 - Aug 2022

- Created automated shoreline image masking in UAS photogrammetry by utilizing machine learning
- Trained an image segmentation model achieving 95% IOU using Pytorch and Keras
- Incorporated image masking in Metashape workflow, significantly reducing errors and time to develop 3D models

PROJECTS

Leetcode Discord Bot Dec 2022 - Feb 2023

- Built a Discord Bot using Node.js that generates Leetcode problems for interview preparation
- Web-scraped Leetcode using Puppeteer and Cheerio and stored the data in a SQLite database
- Deployed and maintained on AWS EC2 instance, serving my club's 1,000+ Discord members

"Lowkey" Web App Aug 2022 - Dec 2022

- Designed an e-commerce web app that connects users to products from local small businesses
- Led frontend design and development using Figma, React, and Bootstrap
- Integrated REST APIs using Axios and implemented Google Maps API for location-based discovery

SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML, CSS

Frameworks/Libraries: React, Svelte, Node.js, Flask, Bootstrap

Tools: Git, NX, Vite, Playwright, Jest, Linux, AWS EC2, Figma

EDUCATION

Bachelor of Science, Computer Science

August 2018 – May 2023

California State Polytechnic University, Pomona
